

 Pakistan National Accreditation Council	NON-CONFORMITY REPORT FOR ASSESSMENT VISIT		F-02/06	
			Issue Date: 11/11/19	
			Rev No: 06	

ACTIVITY:	☒ Assessment		☐ Surveillance	
	☐ Re-Assessment		☐ Scope extension	
	☐ Other Please specify:			
ORGANIZATION:		Quality control Lab vital Agri. Nutrients (Pvt) ltd.		NCR No: 7
Department:		Labs		Accr./Appl.No:
Team Leader.		Mr. Atique Ur Rehman		Non-conformity category: Very serious ☐ Essential ☒
Assessor		Dr. Muhammad Aftab		
Expert		Mngt. Rep.		
				Time limit for correction: 6 weeks

DESCRIPTION: The VAN Laboratory has not developed a lab procedure for control of technical record (QCL-LSP-20) (NC).			Requirement of: ISO/IEC 17025 ☒ ISO 15189 ☐ ISO/IEC 17021 ☐ ISO/IEC 17020 ☐ Others:
10-01-2025 Date	Signature Assessor/Expert	 Signature (Management Representative)	Ref. Organization's doc.

CORRECTIVE ACTIONS: (Note: It is mandatory to attach Root Cause Analysis) Corrective action for shortcomings on the NC has been taken by developing the procedure for control of technical record (QCL-LSP-20).		☐ It is not necessary to attach documentation
Action are documented in the amendment no: 14-02-25 Date		 Signature (Management Representative)

REASON FOR CLOSING: (To be filled in by the Team Leader.)	
☐ The non-conformity is closed based on satisfactory documentation from the organization ☐ The non-conformity is closed based on recommendation from the technical assessor ☐ Implementation of the corrective actions will be followed up at the next visit	
Remarks (if any) ----- ----- -----	
The non-conformity is closed: _____ Date Signature (Team Leader.)	

	CORRECTIVE ACTION REQUEST	Doc. No.	QCL-FRM-9.01
		Issue Date	01-10-2024
		Rev#	01

Initiated by: Masab Rasheed	Department: QC Lab	CAR No. CA-07-02-2025
Designation: AQCM	CAR Initiated Date: 08-02-2025	NC No. 07

CAR Initiated due to (Please tick the relevant appropriate box below)

 ☐ Complaint
 ☐ Accident/Incident
 ☐ Internal Audit
☐ Suggestion/Improvement
 ☐ Technical Fault
 ☐ Others

A. Description (to be filled by Initiator) The VAN Laboratory has not developed a lab procedure for control of technical record (QCL-LSP-20) (NC).  Signatures		
Significance/Priority Level	☒ Urgent ☐ Normal ☐ Non-significance	
☒ Accepted ☐ Rejected	Assigned to: Masab Rasheed Date: 08-02-2025	
* If accepted then Manager QC to mark it to concerned person for Root Cause Analysis.		
B. Root Cause Analysis (where required) The laboratory lacks a structured process to review and ensure compliance with ISO/IEC 17025:2017 documentation requirements, resulting in the omission of QCL-LSP-20 for control of technical records.		
C. Proposed Action	Target Date:	14-02-2025
Corrective action for shortcomings on the NC has been taken by developing the procedure for control of technical record (QCL-LSP-20).  Name or Signatures (Person who carried out Root Cause Analysis and Proposed Corrective Action)		
D. Verification by Manager QC for implementation & Effectiveness		
Is Proposed Action Implemented?	☒ YES ☐ NO	Is it Effective? ☒ YES ☐ NO
Remarks (If any): CAR closing date: <u>14-02-25</u> Manager QC Sign:

Cause Effect Diagram

3W2H /5W2H	Phenomenon of Problem / Question	Explanation / Answer
WHY	Why was the procedure (QCL-LSP-20) not developed?	The laboratory staff were unclear about the requirement for this procedure.
WHY	Why were the laboratory staff unclear about the requirement?	There was no formal training or communication about the need for this specific control procedure.
WHY	Why was there no formal training or communication?	The management team overlooked the inclusion of this requirement during the implementation of quality control processes.
WHY	Why did the management team overlook the requirement?	There was no comprehensive review of ISO/IEC 17025 standards and associated requirements for technical records during quality planning.
WHY	Why was there no comprehensive review of the standard?	The laboratory lacks a structured mechanism to verify compliance with all ISO/IEC 17025 documentation requirements.
How	How can we ensure that the procedure is developed?	Assign a responsible team or individual to review ISO/IEC 17025 requirements and develop the procedure (QCL-LSP-20).

	ROOT CAUSE ANALYSIS FORM	Doc. No.	QCL-FRM-9.04
		Issue Date	01-10-2024
		Rev#	01

		• Conduct a gap analysis of all quality documentation to identify any missing procedures.
How	How can we prevent this issue from recurring?	• Implement a structured process to regularly review and update documentation against ISO/IEC 17025 requirements. • Provide targeted training for staff and management on the importance of quality system requirements, including technical record control.

Root Cause: The laboratory lacks a structured process to review and ensure compliance with ISO/IEC 17025 documentation requirements, resulting in the omission of QCL-LSP-20 for control of technical records.

RCA Statement: The laboratory lacks a structured process to review and ensure compliance with ISO/IEC 17025 documentation requirements, resulting in the omission of QCL-LSP-20 for control of technical records.

1. Purpose

- 1.1 The procedure for control of records provides guidance to manage the technical records being generated in an effective and controlled manner:
 - a. Identification of Records
 - b. Indexing Records and Controlling their distribution
 - c. Managing changes in Records
 - d. Controlling and Indexing Records
 - e. Record safety and retention
- 1.2 Records generated through performance of tests, inclusive of rough calculations are provided with appropriate protection to ensure their integrity and confidentiality

2. Scope

- 2.1 This procedure applies to all types of records and data being generated at QC LAB.

3. Important Terms

- 3.1 **QC LAB:** Quality Control Laboratory
- 3.2 **DCR:** DCR is an abbreviation for Document Change Request

4. Responsible Designations

- 4.1 Chief Executive Officer
- 4.2 Quality Control Manager (QCM)
- 4.3 Assistant Quality Manager (AQCM)
- 4.4 Analysts

5. Procedure

5.1 Control of Quality records

- a. Master list of quality record is maintained which indicates following:
 - i. Title of the record
 - ii. Record owner/ location of record
 - iii. Retention period
- b. The retention period of the records is established for certain period during which the record may be required for study or verification. The main factors determining the retention period are as following:
 - i. Duration of the service period contract
 - ii. Period between quality system assessments
 - iii. Legal and regulatory requirements
 - iv. Re-testing intervals
 - v. Training records are held as long as an employee stays with the organization
- c. Reading noted down on rough registers should be kept as part of record as well. Following is the detail:
 - i. Page # each page of register for traceability
 - ii. Rough register should be labelled in following manner

Title	
Serial No.	
Volume No.	
Responsibility	
Opening Date	
Closing Date	

- d. All registers start with volume 1, and the volume increases every time a register is completed and a new register under the same Title and Serial is initiated.
- e. Records are stored in files that are properly numbered and indexed for easy retrieval and to avoid damage. Cabinets containing records are labelled to display their contents.

CONTROL OF TECHNICAL RECORDS

5.2 Managing Technical Records

NO. _____

- a. Technical Records are considered of the following types:
- Results from equipment
 - Results from information systems connected to equipment
 - Results calculated and documented in Lab registers
 - Results received from quality assurance activities (including external activities)
 - Calculations and readings from statistical activities such as Measurement Uncertainty
 - Results and reports from calibration certificates
 - Original readings and observations
 - Rough calculations
- b. Records are kept under the custody of authorized personnel only, and when in hard copy, they are stored in access-controlled location
- c. Amendments in hard copy records are made in such a manner that values or statements being modified are clearly visible. The person making change ensures signing of the update

5.3 Record Identification

QC LAB has defined a system for the identification of records used in the lab. The system includes:

- Coding Scheme
- Header Format

5.4 Record Coding Scheme

QC LAB has established a record coding system, which is applied to all the records being generated or maintained by Lab. All the records have uniquely identification code.

Detail of record coding scheme for Laboratory System Format is given below;

"QCL-TTT-NNN"

Where,

QCL: Quality Control Lab

TTT: Type of record, e.g. LSP, FRM

NNN: Serial Number of Record File, given in incremental order.

 CONTROL OF TECHNICAL RECORDS	Doc. No.	QCL-LSP-20

6.0.

MASTER

Record Label

CONTROLLED COPY

NO. _____

All records are generated with following standard header.

6.1. Front Label

	
File Code	
Record Title	
Volume #	
Date Started	
Date Closed	
Keeper	
File Location	

Where,

Record Title: record name such as Master List of Records

File Code: record code as mentioned in section 5.3

Volume: represents issue status of record starting from 01, 02 and so.

6.2. Side Label

	
File Code	
Record Title	
Volume #	
Date Started	
Date Closed	
Keeper	
File Location	

7.0 Record Storage and Security

- 7.1. Assistant Analysts enter the data into the computer software/databases.
- 7.2. It is the responsibility of Assistant Analyst to keep the entire testing related data password protected and only Analyst can access the data.
- 7.3. Only QCM & AQCM have access to make any changes in the data being kept.
- 7.4. Records of all these changes will be kept and changes will be highlighted.
- 7.5. Data is only be transmitted through emails and the records of such emails will be maintained.
- 7.6. Assistant Analysts are also responsible to take the periodic data backups i.e. once per month minimum.

8.0 Amendment in Records

- 8.1. Physical records (on paper) can be amended for correction of spelling or grammatical errors by striking out the incorrect portion with a single line as this "~~this is incorrect~~", and entering the correct word alongside with initials of the authoritative person.

Note: This also applies to data that is entered on registers.

- 8.2. In case a Physical record expresses error in values of test results (e.g. an incorrect test report), it is reprinted / reproduced with renewed identification. Previous record is marked as obsolete and stored with obsolete records.
- 8.3. Records kept in electronic form are amended after authorization by concerned officials, while making sure that incorrect version is backed up in a separate folder.

9.0 File Management

VAN QCLab has established a filing system to manage and control all the files, folders and registers being maintained which provides the details about uniquely identifying and file labeling.

9.1. File/Folder/Register Coding System

All files, folders and registers will have a unique identification code according to this scheme;

"QCL- FIL-NNN"

Where,

QCL: Quality Control Lab

FIL: Represents File/Folder/Register

NNN: Represents serial number of documents starting from 01, 02 and so on. Serial number is reinitialized if the document type changes.

10.0 Access and Disposal of Retained Records

When the retention period of records is expired, Assistant Analyst reviews the validity and usefulness of records and then decides whether to dispose-off or further retain in consultation with the QCM/AQCM.

Retention period of all LMS records is minimum 3 years whereas retention period of calibration certificates, test reports and related technical reports is decided after reviewing suitability and organizations policies

11.0 Relevant Documents

11.1 Master list of records (QCL-RRM-20.01)

11.2 Master List of Files and Folders (QCL-FIL-20.02)

11.3 Technical Records
