Interpreting Z Scores and Flags:

Red indicates a normally distributed Z value >3 or <-3 (requires action), Orange = Z between 2 and 3 or -2 and -3 (warning) and Green = Z < 2 and >-2 (OK at 95%). Flags indicate data usage: 0 = Used, 1 = rejected for duplicates too far apart, 2 = rejected as extreme outlier, 3 = removed from stats, 4 = rejected due to 0s submitted, 5 = LOD. The 9 Flag indicates a data problem - scores not calculated.

Notes:

Robust statistics not used if < 6 labs used in calculations, in this case Values and Z Scores are grayed out and should be interpreted cautiously. Your offset values are higher (±) or lower (†) than the Robust Analyte value ± 1A. Analyte codes in light green indicate a guaranteed analyte. Lab values below detection limits reported solely for this PT program.

* Value (if guaranteed in Sample!) is the Robust Analyte Value estimated using the primary Analyte Codes for this sample and may not reflect the Label value.

Notes: The Methods you used are indicated above and the # Labs involved are below the Box and Whisker. Your Z-Score is indicated by the Black Dot. If you do not see a Black Dot your score is off the chart. Dots between the Green lines are acceptable Z-Scores. Dots outside the Red lines are actionable. The Bar, Box and Whisker represent Median, 25% to 75% percentile and 5% to 95% percentile respectively.
